- Guaranteed all daily travel arrangements made by corporate travel department complied to needs of executives.

APPLICATIONS

Carbon Footprint

- A modern, user-friendly application designed to track one's daily carbon footprint based upon multiple factors. Users can track their daily emission rates, compare with other users, receive suggestions on how to lower daily emission rates, as well as access a customized environmental news feed and a current weather report. Utilized Vue.js, Node.js, Express, AuthO, SASS, and MongoDB.

Kanban

- A full stack project management/visualization application designed to streamline a team's weekly objectives, and track their progress from start to finish. Kanban allows a team to easily visualize product ownership, task status, and overall team progress. Utilized Vue.js, Node.js, Express, AuthO, SASS, Bootstrap, and MongoDB.
